Seal Out Decay Program

In an effort to reduce dental decay in the kids of our community, Alpine Kids Dentistry has created a "Seal Out Decay Program". We are offering **free** sealants to your children in grades K-6. Please call our office at 801-377-KIDS (5437) to schedule an appointment for your child. At this appointment, Dr. Kevin Brown DMD, MSD (Board Certified Pediatric Dentist) will do an exam, and if teeth are decay free, he will seal any molars (including baby molars) at no cost or further obligation for dental care. Attached is a coupon to bring to your appointment.

About Sealants: Bacteria found in dental plaque cause tooth decay. By placing sealants into the grooves of teeth, we create a tooth surface that is smooth, eliminating pits and grooves where most cavities form. This allows dental plaque to be removed easily and effectively with regular brushing; reducing the chance that tooth decay will form. Be proactive in preventing dental decay by having sealants placed on your child's baby and permanent molars.

Pre-Sealant

Post-Sealant

Childs Name: _____

This coupon is good for free sealants in our dental office located on Pioneer Crossing and 1100 West, Suite B; in the new building next to Gordon family dental and Aloha Orthodontics. Please call us at 801-377-KIDS (5437).
